## MARCH/MARS

### ARTICLES:

- Demetrios Panagiotakopoulos** An optimization model for balancing economic-environmental systems 1
- Cliff D. Smith** Hydraulic investigation of a unique proposal for the Carrot River bridge crossing 10
- J. L. Humar and E. W. Wright** Shear and overturning moment for earthquake-resistant building design 22
- D. E. Allen** Limit states design—A probabilistic study 36
- J. D. Barrett, R. O. Foschi, and S. P. Fox** Perpendicular-to-grain strength of Douglas-fir 50
- Jean Bérard, Richard Roux, and Marc Durand** Performance of concrete containing a variety of black shale 58
- Carl Brewanger and Yaroslav Symko** Thermal stresses in steel-concrete composite bridges 66
- B. G. Hutchinson** Tools for urban land use—Transport strategy planning 85
- A. E. Long, K. Van Dalen, and P. Csagoly** The fatigue behavior of negative moment regions of continuous composite beams at low temperatures 98

### NOTE:

- A. Rutenberg and A. C. Heidebrecht** Approximations for natural frequencies of interconnected walls and frames 116

### DISCUSSIONS:

- S. D. Lash** Limit states design—An innovation in design standards for steel structures: Discussion 120
- D. J. Laurie Kennedy** Limit states design—An innovation in design standards for steel structures: Reply 121

## JUNE/JUIN

### ARTICLES:

- Franz Knoll** Structural design concepts for the Canadian National tower, Toronto, Canada 123
- J. V. Danys** Effect of ice and wave forces on the design of Canadian offshore lighthouses 138
- T. W. Lumsden and W. L. C. Knowles** General aspects of water supply and treatment in Ontario 154
- D. J. Gamble and P. Lukomskyj** Utilidors in the Canadian North 162
- Knud Manniche and Gordon Ward-Hall** Mission bridge—Design and construction of the steel box girder 169
- R. M. Isaacs, S. T. Maitland, and A. M. Mirza** Foundation design problems of some bridges near Welland, Ontario 193
- R. B. Malloy and D. J. Davies** The design and construction of Burton bridge 209

### DISCUSSIONS:

- F. G. Rice** Structural behavior of buried plastic pipe: Discussion 241
- A. Y. Fagnou and Karim W. Nassar** Structural behavior of buried plastic pipe: Reply 243

## SEPTEMBER/SEPTEMBRE

### ARTICLES:

- Michel A. Sargious, Grant A. Ross, and Gerald A. LeMoal** Curling deformations and stresses of insulated rigid pavements 245
- Jean-B. Sérodes et Alain Soucy** Etude de la coagulation des eaux par fluorométrie 253
- T. I. Campbell, L. N. Francis, and B. S. Richardson** A long curved post-tensioned concrete bridge without expansion joints 262
- Borg Madsen** Strength values for wood and limit states design 270
- M. John Frye and Glenn A. Morris** Analysis of flexibly connected steel frames 280
- B. G. Hutchinson, W. B. O'Brien, and I. N. Dawson** A national commodity flow model 292

A. L. Mee and I. J. Jordaan	Simplified analysis of staggered wall-beam frames	305
Michel A. Sargious and John F. Morrall	Simplified traffic forecasting process for small cities	314
Thomas Paulay	Design aspects of shear walls for seismic areas	321
J. H. Rainer	Simplified analysis of dynamic structure-ground interaction	345
Eugenio Pollner, W. K. Tso, and A. C. Heidebrecht	Analysis of shear walls in large-panel construction	357

#### NOTE:

M. I. Gilmer	Choice of prismatic crane column selections by computer	368
--------------	---------------------------------------------------------	-----

#### DECEMBER/DECEMBRE

#### ARTICLES:

A. M. Neville	Is high-alumina cement a satisfactory structural material?	373
J. W. Kamphuis	Performance of light coastal structures under normal and high water conditions	381
Darryl J. Calkins and George D. Ashton	Arching of fragmented ice covers	392
L. J. Zabilansky, D. E. Nevel, and F. D. Haynes	Ice forces on model structures	400
Ronald L. Droste and James P. Hartt	Quality and variation of pollutant loads in urban storm-water runoff	418
N. D. Nathan and J. R. MacKenzie	Rotational components of earthquake motion	430
C. D. Smith and D. G. Murray	Cobble lined drop structures	437
A. C. Heidebrecht	Dynamic evaluation of overturning moment reduction factor used in static seismic loading	447
Ram S. Ghosh and J. Neil Mustard	Insulated forms and thermal shock in winter concreting	454
Borg Madsen	Moisture content-strength relationship for lumber subjected to bending	466
D. H. Male and Don M. Gray	Problems in developing a physically based snowmelt model	474
W. K. Tso, A. Rutenberg, and A. C. Heidebrecht	Cyclic loading of externally reinforced masonry walls confined by frames	489
V. V. Bertero and H. Kamil	Nonlinear seismic design of multistory frames	494
D. A. Taylor	Progressive collapse	517
John H. Shortreed and John A. Ireland	Feeder bus service for commuter rail	530
G. R. Mogridge and W. W. Jamieson	Wave forces on a circular caisson: theory and experiment	540
A. W. Peterson	Universal flow diagrams for mobile boundary channels	549
D. L. Anderson, R. G. Charlwood, and C. B. Chapman	On seismic risk analysis of nuclear plants safety systems	558
Neil M. Hawkins, Denis Mitchell, and Samir N. Hanna	The effects of shear reinforcement on the reversed cyclic loading behavior of flat plate structures	572
H. J. A. Neu	Runoff regulation for hydropower and its effect on the ocean environment	583
T. Paulay and S. M. Uzumeri	A critical review of the seismic design provisions for ductile shear walls of the Canadian code and commentary	592

#### NOTES:

Don Nixon, Denis Beaulieu, and Peter F. Adams	Simplified second order frame analysis	602
T. Dale Rokosh and K. W. Nasser	Influence of testing variables on the concrete compressive strength	606
Masaaki Suko and Peter F. Adams	Empirical equation for the fundamental natural period	611

#### DISCUSSIONS:

P. J. Sereda and P. E. Grattan-Bellew	Performance of concrete containing a variety of black shale: Discussion	620
J. Bérard, R. Roux, and M. Durand	Performance of concrete containing a variety of black shale: Reply	621
